

PG-SERIES PG200

AVERAGE POWER UP TO 80 KW AND PEAK POWER UP TO 36 MW

PG200 is designed to provide electrical pulses up to 36 MW with unparalleled performance. It's easy to integrate and equipped with ScandiNova's modern and user friendly control system – ScandiCat. The products within the PG-SERIES have a very resistant casing to withstand demanding industrial applications, which make them a perfect choice for e.g. Pulsed Electric Field generation in food processing and are perfectly suited for research needs where mid-range pulse generators are needed.
